Locking Waist belt / Hobble

A traditional transport belt with The Grip's locking buckle. Lighter than leather and more easily sanitized.

RST-WBH-1

58 1/2" strap with locking buckle. Secure ankles together to eliminate damage to squad car interiors. Restricted, but controlled, walking Waist to ankle hobble.

RST-WBH-DR-1

A traditional transport belt with a 2" D-ring in front for typical handcuffing. Lighter than leather and more easily sanitized.

RST-KEY

Replacement handcuff key.

RST-INST-DVD

Instructional video on DVD

If your system contains any parts not shown in this catalog please contact a representative of Restraint System Technologies to order.

Wrist Restraint

A one size fits all alternative to traditional restraint means. Eliminates metal-to-skin injuries commonly caused by traditional metal handcuffs.

RST-WR-1

Eliminates metal-to-skin injuries caused by traditional metal handcuffs. Double Locking is eliminated by a simple and secure one-step closure process. Uses a standard handcuff key.

RST-WR-DR-1

Custom D-ring option can be placed at customer specified position on this system.

RST-APST-1 (optional)

2 wrist and 2 ankle padded wraps. The set affords additional comfort and safety during long haul transports and extended periods of restraint.

RST-BUMP

Replacement rubber bumpers to prevent metal to skin contact.

RST-KEY

Replacement handcuff key.
