

NRG LAND BUMP HELMET

CE CE-EN 1078

ABOUT

Kraken Products has developed the **LAND** bump helmet to be rated as not only one of the lightest helmets in its class but also the most functional for professional use. Although incredibly light weight the NRG land helmet maintains excellent durability, integrity and protection.

The NRG land bump helmet has been designed around the professional user who currently uses a product developed for recreational and sports use. By reducing the weight and adding the many important modifications such as zero reflective matte black finish, hard wearing goggle strap, light stick holder and unbeatable air circulation system we have produced the ultimate professional helmet. We have also included a multi language sticker kit which contains hard wearing waterproof stickers for police, military and search and rescue. The Kit also includes a waterproof Velcro patch for easy attachment of national identification Velcro patches. Each helmet comes in a durable mesh bag with ID strip so helmets can be quickly identifiable and kept safe.

The NRG LAND bump helmet is certified to **CE-EN1078** safety helmet standards and produced in our ISO 9001 manufacturing plant.

Replacement Accessory Kit (available separately)

Hi Visibility reflective strips – 2 x Removable chin protectors – Velcro patch – International ID sticker kit - Replacement 1.5inch sticks

NRG LAND BUMP HELMET

TECHNOLOGY

CE-EN 1078

The lightweight durable interior foam offers the wearer maximum protection and comfort. The foam is designed to mould to your head to promote high levels of comfort and protection.

This has again been designed with the professional user in mind giving maximum protection with minimum weight.

For the professional user the entire surface is matt black with zero reflective surfaces making the product stealth for covert use.

NRG has designed and developed a unique hardware goggle strap for the professional user. This allows you to quickly remove your goggles without losing them. The goggle strap also includes our unique light stick holder which holds illumiglow 1.5inch sticks. This makes it simple for you to mark each other for quick and clear identification.

All 9 air holes and the side vents are protected by our mesh net to stop both insects and debris from entering the helmet. The mesh net is light so as not to add any additional weight to the Archangel land helmet.

POLICE

RESCUE

MILITARY

Our international sticker pack includes hard wearing identification stickers in 7 different languages for military, police and search and rescue. The pack also includes a waterproof Velcro patch so that national ID patches can easily be attached. (Languages- English, French, German, Spanish, Italian, Arabic, Chinese.)

SIZING

For the NRG LAND helmet we have produced a unique head lock fitting system To reduce the amount of movement when the helmet is being worn. The fitting system was designed with professional users in mind giving ample room for skull caps, bandanas and balaclava's etc but also being able to quickly and simply adjust the fit when worn without.

Small – Medium = 51 – 56cm
Medium – Large = 53 – 59cm
Large – X-Large = 55 – 61cm
