STYLE GLOSSARY .....39

The Company presently known as Wellco Enterprises, Inc. began operations in 1941 under its original name, Wellco Shoe Corporation.

By way of background, the history of Wellco goes back to the nineteenth century when the grandfather of the founding partners started the family's first shoe factory in Germany. In the early 1930's, the German company developed the first practical method for molding and attaching a rubber sole to a shoe upper in a single vulcanizing operation. The German company had the foresight to patent this technology worldwide.

Early on, the principals of Wellco founded another company, known as Ro-Search Inc., which specialized in licensing the partners' patented technology to other manufacturers around the world and in manufacturing the specialized molds and presses required for the use of their processes. Ro-Search still survives today as a subsidiary of Wellco, which eventually changed its name to Wellco-Ro-Search Industries, Inc. A further name change took place in the early 1960's to the present designation, Wellco Enterprises, Inc.

When Wellco began manufacturing, it specialized in light-weight slippers and casual footwear with sponge rubber soles. Except for a brief time, during World War II when the use of rubber was restricted to defense purposes, Wellco continued to manufacture and market such footwear, trademarked Wellco Foamtreads, until approximately 1985.

In 1965, as a result of unsatisfactory performance of previous Army combat footwear in the jungles of Vietnam, the Army adopted Wellco-Ro-Search technology for the manufacture of its hot-weather boots, and this product thus became known as the "Vietnam Boot." Later the technology used to manufacture the Vietnam Boot was adopted for all Army combat footwear. Wellco became a prominent supplier of such footwear to the US Military in 1965, and the remainder of the Army's needs were supplied for a number of years by three other companies, all of them using Ro-Search supplied molds and presses, as well as technical advice. To this day, the technology is used to manufacture military combat boots.

True to its heritage as a developer of footwear manufacturing technology, Wellco's subsidiary Ro-Search Inc., perfected and patented in 1957 a new technique for molding and attaching a rubber sole to a welted upper. This was known as "Process 82," to indicate that it was considered to be twenty five years ahead of its time.

Through the years, Wellco and Ro-Search have participated in numerous further developments of combat footwear for the US Military. For instance, a desert boot was developed and adopted in 1991 to include features and improvements specified by General Schwarzkopf for Operation Desert Storm. The present generation of combat boots, with a direct-molded rubber base sole, a polyurethane midsole and a rugged high-traction rubber tread sole can be traced to a development contract awarded to Ro-Search in 1995 by US Army Natick Laboratories. Similarly, the first military blast-protective boots and overboots were developed and produced by Wellco and Ro-Search.

The most recent addition to Wellco is a brand-new state of the art facility in Morristown, TN. The new facility has been labeled the largest footwear molding facility in North America.

***Today Wellco continues to be innovative in footwear and continue its excellence in quality, comfort, and design. In the battlefield, nowhere is performance more critical. And when it comes to footwear, no company knows this better than Wellco. From the jungles of Vietnam to the mountains of Afghanistan, our boots have left their prints in the world's most hostile conditions. As our best and bravest return home, we are guided by one simple directive: There and Back. Translated this means delivering the same advanced footwear solutions our warriors have come to trust no matter where the fight takes them—be it a rocky bluff in the Hindu Kush or a dark alley in the inner city.***

PUNCTURE RESISTANT - Products with the PUNCTURE RESISTANT icon provide additional safety to the bottoms of your feet by preventing objects from penetrating at the sole of the footwear.

COMPOSITE TOE - Products with the COMPOSITE TOE icon will protect your toes from various objects. All models meets ASTM F2412-05 and F2413-05 Standards.

STEEL TOE - Products with the STEEL TOE icon will protect your toes from various objects. All models meets ASTM F2412-05 and F2413-05 Standards.

HOT WEATHER - Products with the HOT WEATHER icon are for warm to the hottest weather conditions/climates and seasons.

WATERPROOF - Products with the WATERPROOF icon are for wet conditions/climates and seasons, which keep your feet dry. These are also labeled as Temperate Weather products.

EXTREME COLD WEATHER- Products with the EXTREME COLD WEATHER ICON are insulated products for the harshest cold weather conditions/climates.

AIRPORT FRIENDLY- Products with the AIRPORT FRIENDLY ICON are 100% non-metallic products, which allow easy entry through authorized security areas.

SLIP & OIL RESISTANT - Products with the SLIP & OIL RESISTANT icon will supply additional safety in slick and oily conditions.

SIDE ZIPPER - Products with the SIDE ZIPPER icon will supply convenience for donning and doffing of footwear with a smooth and sturdy in-step zipper.

MOISTURE WICKING - Products with the MOISTURE WICKING icon are for various conditions, which will keep your feet cool and dry in hot weather, as well as warm and dry in cool weather by transpiring moisture from your feet to the atmosphere.

ANTIMICROBIAL - Products with the ANTIMICROBIAL icon are products treated with an odor inhibiting process or product. Antimicrobial products are also capable of providing resistance against bacteria.

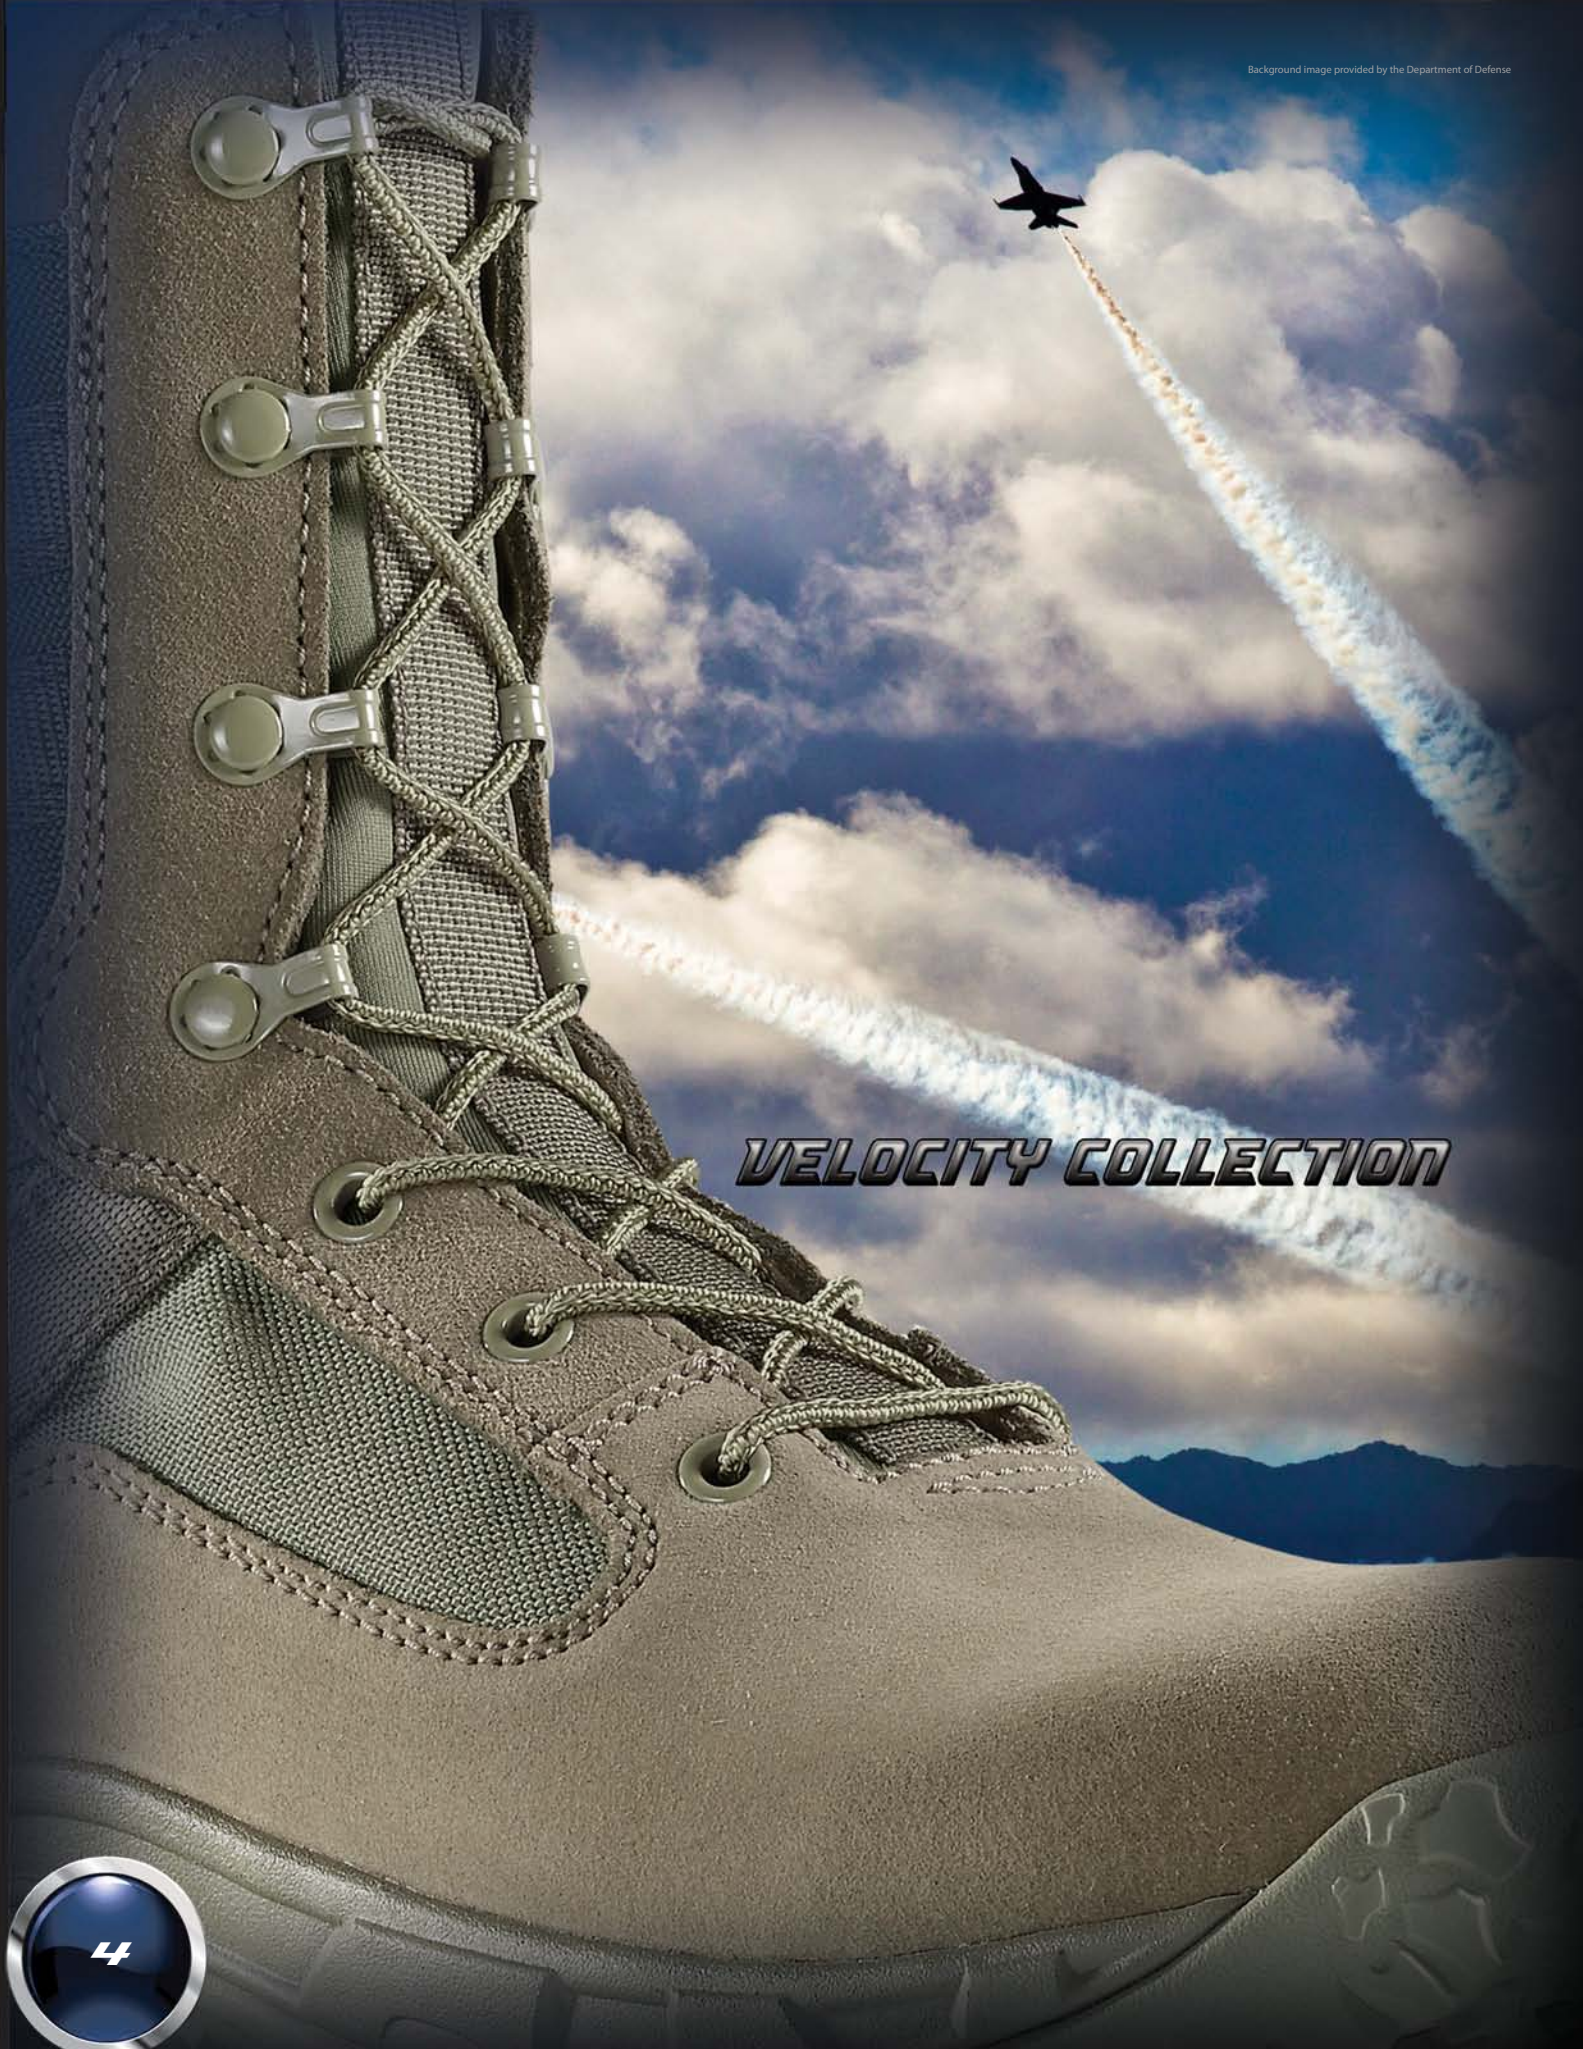

EH RATED - Products with the EH RATED icon will protect your feet in an electrical hazard condition/environment.

FLAME RESISTANT - Products with the FLAME RESISTANT icon are for harsh and risky fire environments. These particular products will self-extinguish at the FR locations when contact is made with a blazing substance.

**219 - BROWN RESISTOR PLAIN TOE WORK BOOT**

The RESISTOR PLAIN TOE Work Boot is sharply designed and constructed for messy conditions. Built with sturdy lower quarters, the RESISTOR PLAIN TOE allows for easy cleansing of chemicals with superior protection against animal fats, chemicals, abrasions, and oils & greases. The same is sought after in the properties of the outsole using an extreme slip & oil resistant Wellco Resistor made of lightweight non-tracking rubber providing extra safety in slippery environments. Not only is the focus on the outer shell of the RESISTOR PLAIN TOE boot, in addition to a waterproof liner keeping your feet dry, the Wellco Elite Signature Insole will supply your feet with superior comfort while on the job.

FULL SIZES: 4 - 14 REGULAR & WIDE  
 HALF SIZES: 7.5 - 11.5 REGULAR & WIDE  
 HEIGHT: 6 INCHES  
 WEIGHT: 26.55 OZ.

*At Wellco, through teamwork and a commitment to excellence we continually improve our process in order to deliver the best value, highest quality footwear and custom manufacturing products worldwide. We are committed to being very aggressive in our attitude towards quality and customer satisfaction, primarily since we strive to be ranked as the "best" in our market. Quality is not just another goal; it is our basic strategy for survival and future growth.*

With any Wellco footwear purchased we guarantee premium quality and comfort. If our footwear does not meet your expectation within 30 days, you may return the unused footwear, and we will fully refund your cost of the footwear purchase. We will replace or repair footwear at our discrepancy if you experience a defect in workmanship or materials within one year of your footwear purchase outside of normal wear and tear from continuous use. Any purchase or issued boot must be returned through the location of the boot purchase or issue. All returns and exchanges are subject to the purchasing and issuing location's return and exchange policy.

Footwear qualified for return/exchange must be returned to the location of purchase with a valid sales receipt. If the footwear was purchased directly from Wellco, the footwear must be shipped at customer's expense with the return authorization number provided by customer service clearly labeled on the packaging. All returns/exchanges are subject to a 10% restocking fee.

**Return & Exchange Policy Exclusions:**

1. Normal wear & tear
2. Damaged due to extensive use
3. Damaged due to inadequate maintenance
4. Once footwear has been worn, incorrect size/fit
5. Footwear returned beyond warranty period
6. Damaged due to chemicals or other unknown substance
7. Safety Toe footwear after sustaining initial impact
8. Damaged from mishap including abuse, cuts, abrasions, etc.
9. All discontinued, closeout, and second item sales are final
