

# TAKE IT BY STORM

MARINO  
**STORM CASE**  
Defy the Elements

Storm Cases are designed to transport and protect your valuables even under the most adverse conditions.

## Rock Solid Protection

Avid sportsmen, professional photographers, sound engineers, scuba divers, boaters, military personnel, industrial workers and people who just plain love their tools, equipment or electronics all use Storm Cases from Hardigg to protect their most valuable gear. Because no matter what you need to transport, you can trust that it's secure in a Storm Case. Sandstorms, water, even collisions and impact won't affect the equipment inside. From high-tech to intricate

or delicate, the security of a Storm Case ensures everything arrives as it was packed, in undamaged, working order. And beyond just protecting your gear, every added measure has been taken to provide for handling your Storm Case comfortably along the way, too. With over half a century of experience behind our developments, we're confident that the solution to your specific transport challenge is a Storm Case.

iM2100 The option of easy-to-customize, multilayer cubed foam to secure your specific gear is available with most cases.

iM2400 Optional padded dividers separate and protect even the smallest, most delicate equipment.

iM3300 Press & Pull latches hold fast under duress, yet make every Storm a cinch to open smoothly without snapping back on your fingers.

iM2370 Lid organizers feature deep expandable folder pockets plus several smaller pockets for attaché-style storage and access.

iM2500 A large selection of Storm Cases meet airline carry-on regulations by fitting under seats and in overhead compartments.

iM2600 The unique hinges with feet on every Storm Case hold fast under impact and are specifically designed to create a flat surface for upright stability.

iM2720 Storm Case's Storm Trak® series boasts uniquely rugged, yet lightweight, telescoping handles that lock in place plus rugged in-line wheels for ease of transport (available in a wide range of sizes).

A lifetime guarantee ensures your Storm Case will outlast every situation.

## Every Element Adds to the Power of a Storm

Storm Cases are built to withstand impact, temperature, moisture and rough transit. From the development of our own tough HPX® resin material to specific user-friendly innovations like stacking ribs for no-slip stacking; anti-shear teeth to keep lids from shifting during impact; and uniquely designed hinges with feet to allow sturdy upright standing – every detail of a Storm Case is the result of meticulous foresight and testing. Changes in environment and altitude are even accommodated with a unique, built-in Vortex® valve that blocks water or dust while automatically adjusting air pressure. And because it's permanently attached, the Vortex® valve won't come unscrewed and disappear like the valves on other cases.

Whether packed in multilayer cubed, custom-cut foam or stored amid optional padded dividers, everything inside a Storm Case is cushioned from movement and damage. You can even add the security of your own padlock, thanks to molded-in hasps. Beyond inner protection, the Storm Case also boasts a plethora of user-friendly outside features. Double-layered, soft-grip handles combine uncompromising strength with lasting comfort. Ultra-durable Press & Pull latches open smoothly yet hold fast under impact. Storm Trak series cases even add the advantage of rugged in-line wheels and a telescoping handle. No other case combines as many handling benefits with the security and protective power of a Storm.

**iM2750** Multiple handles provide additional transport options for larger and heavier packed Storm Cases.

**iM2200** The addition of optional lid stays will hold your Storm Case securely open for easier access.

**iM2400** Add a bezel kit and you can transport ultra-sensitive panel mounted equipment with ultra-confidence.

**iM2300** The option of custom-cut foam ensures that your specific gear is completely secure.

**iM2050** Small to large sizes suit every equipment need with the same tough features.

**iM2700** Molded-in stacking ribs provide no-slip stability for multiple case stacking during storage or transport.

**iM2950** Along with additional handles, multiple latches on larger Storm Cases ensure maximum security and durability.

**iM2975** Storms come in a full range of heights and depths to accommodate various or bulky-sized equipment.
